CSP-652 - Twist Lock Laptop Security Cable

Installation Instructions

Most laptops should have at least one parallel port. If your laptop does not, request a free glue-on adapter kit at www.computersecurity.com/laptop/adapter.htm or by calling 1-800-466-7636.

Fig. 2-a

Fig. 2-b

1. Loop Cable to an immovable object
2. Find an unused port screw hole (fig 2-a) or attach to optional adapter (fig 2-b).
3. Screw lock into the unused port screw hole or adapter until tight.
4. Push the locking button until it clicks.
5. To unlock, use the key provided. When you turn the key, the button pops up and you can unscrew the lock from the computer.

NOTE: For future key duplicating purpose, when cable lock is purchased, write down and keep your key code number in a safe place.
