

PC PROTECTOR

PCI Alarm Card

'STAND-ALONE'
alarm system for the
single computer

PC Pro ii - \$95.96 *Minimum Order Quantity - 100 Units

Advantages:

- Uses a PCI card that fits into any available PCI slot in your PC
- Connects the alarm to your monitor and printer via a cable and special security tabs.
- If anyone disconnects the cables, or takes apart your PC, or if the power is off and someone attempts to lift your computer with out entering its special security key, a deafening 110 decibel alarm will sound.
- The alarm has a vibration sensor fitted, that will detect sharp movement of the CPU which will automatically arm when the computer is switched off and disarm when the computer is switched on.

Features:

- Prevents unauthorized removal or tampering of computer, monitor, and printer
- Protects up to 3 pieces of equipment at one time
- Provides 24 hour security, even when the computer is switched off
- Prevents RAM Chip Theft
- Uses a unique Electronic key system so multiple units can use the same key
- No drilling, bolting, or permanent gluing is necessary
- No software required
- Easy to install
