

# Steel Cable Kits

To assist our customers, we have put together three steel cable kit systems, ULTIMATE, STANDARD, and ECONOMY.

## FOR DESKTOPS

### *Ultimate Solution* From \$55.97 to \$99.95

These "ULTIMATE" heavy-duty cable kits give the highest level in cable strength available when physically securing IT equipment. Two kits are available. Price range \$79.95 - \$99.95. Additional expansion plates also available.

### *Steel Lok Cable System*

Kits include STEEL fittings for the highest security

### *Steel Lok 1*

**Quantity Discounts Available on all products listed!**

### *Standard Solution* From \$19.37 to \$39.95 → *Most Popular Solution* ←

Our "STANDARD" level is the most frequent selection, offering a high quality solution at a mid-range price. KABLIT Steel Cables Kits offer high quality cable kits to protect any

type of desktop computer. Price range \$29.95 - \$39.95. All parts available in kits or sold separately.

**All cable kits are now available in BLACK or putty!**

### *KAB-105*

includes 10 ft. loop around cable and lock

### *CPM-210/opti*

Specially designed to work with the security bracket found in most newer models of Dell, IBM, Compaq, and other popular PC's.

### *CPM-211*

includes 6 ft. point-to-point cable and lock

### *Economy Solution* From \$12.44 to \$19.95

ECONOMY" kits are available for those who are looking to protect their equipment at the lowest cost possible. Price range \$19.95. All parts available in kits or sold separately.

### *CSP-700*

The cable on these economy kits is slender enough to fit through the security bracket located on most all newer computers. Kit #CSP-700

includes two glue-on attachments, while the use of the scissor clip in kit #CSP-750 enables protection of equipment with an

### *CSP-750*

existing security slot, such as flat screen monitors and takes away the need to permanently glue on an attachment. The

versatility of the lock on the cable allows multiple configurations.

## Ultimate Solution

### Steel Lok Cable System

This kit features patented rubber bonding feet and is terminated at each end with steel fittings. The plates are only 2" in diam-

eter, allowing them to be mounted virtually anywhere on your equipment. All steel

Part #10401 includes:

- 2 - 2" round plates
- 1 - 5' 5/16" steel braided cable
- 1 - 3-gram bottle Adhesive
- 1 - Heavy-duty double locking
- 40 mm keyed lock with 2 keys

### Steel Lok 1

The four patented rubber bonding feet are permanently mounted to the equipment to be secured using the "Super Bond" liquid adhesive. The feet are then locked into the heavy-duty metal encasements that attach to your work surface with

Part #11002 includes:

- 1 pair - Metal encasements
- 4 - rubber bonding feet
- 1 - 3-gram bottle Adhesive
- 2 - keys
- 1 - key extender

## Standard Solution Most Popular Solution

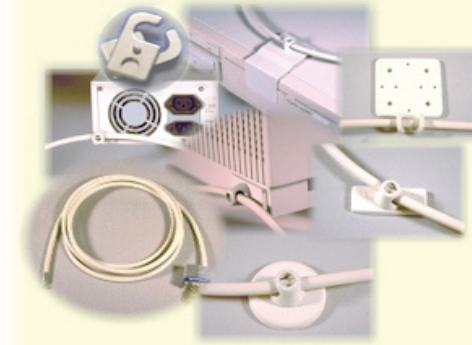

**Most accessories are now available in black or putty!**

**All Locks in the KABLIT line feature "MasterLock" brand locks.**

### ACCESSORIES (From \$1.21 to \$23.95)

In addition to the kits listed on the reverse, many other kits are available with different fasteners. All parts and pieces are also sold separately, including:

### CBL-810

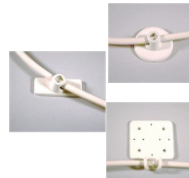

10 ft. loop around cable and lock.

**CBL-830 or CBL-830/L**  
6 ft. point-to-point cable and lock. One end bulletted.

### Glue-On Fasteners

Round, rectangular and flat square glue-on fasteners available.

### HXN-510

Attaches to your equipment using existing surface mounted screws.

### TRP-570

Secures mouse, keyboard, and electrical cables.

### FLBR

Gives you the option to create a loop around an immovable object with a point-to-point cable.

## Economy Solution

Each kit in the economy series includes:

- 6' braided aircraft cable, 1/4", with clear plastic coat
- 7 pin tubular key type security key
- Push-in cylinder allows you to lock the cable without using the key and use key to open

### CSP-700

includes cable, 2 glue-on rectangles, and adhesive.

### CSP-750

includes cable, 1 glue-on rectangle, 1 scissor clip, and adhesive.

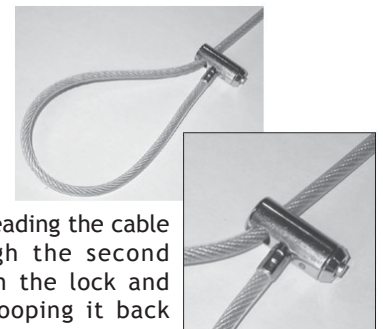

### ACCESSORIES (From \$1.98 to \$14.95)

**CSP-842**-cable and lock

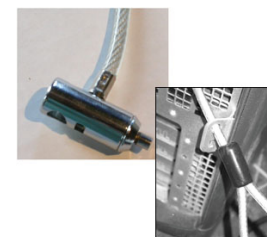

**CSP-891**-glue on rectangle

**XLK/U**-scissor clip

The versatility of the locking mechanism on this cable allows for multiple configurations

By threading the cable through the second hole in the lock and then looping it back into the locking mechanism, you achieve a loop at both ends of the cable.

By locking the lock directly into the locking mechanism, you achieve a bullet on one end of the cable, along with the standard loop at the other end.
