YHR-01 Mounting Ring Installation Instructions

****NOTE**** - By attaching to a frequently used stationary workspace, this fastener can be used when you do not have a table leg to wrap the cable around or data hole available for the laptop cable to go through. This is a permanent attachment using one-way security screws to attach to your equipment.

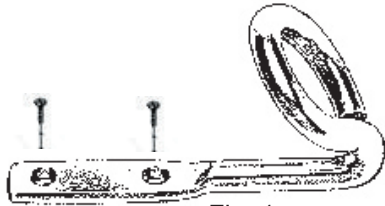

Fig. 1

Fig. 2

1. Select a section of the desk or table you are going to attach the ring to.
2. Using the 2 security screws provided, secure the ring into your desk or table (fig 1). The screws are one-way security screws which means that once they are tightened they can not be unscrewed.
3. Squeeze the loop at the end of the cable to allow to pass through the ring. Then loop the lock end of the cable through the loop (fig 2).
4. Follow the cable lock instructions to attach your lock to your equipment.
